## Reminder of DigiFoodEdu project

### The partners

### Context and Objectives

DigiFoodEdu was born within the **coronavirus crisis** era as teachers and students had to adapt to new ways of distance teaching and learning, developing **new pedagogical practices based on digital education**.

DigiFoodEdu aims to:

- foster the **development of digital skills and exchange of good pedagogical practices in the digital era**
- **study the practices put in place during the pandemic**
- come up with a **best practices guide for education improvement in the digital era**.

Ultimately, the project aims to modernize pedagogical practices used for teaching and supporting students during their project-based learning activities.

## Results of the project

During the last 2 years, we studied the pedagogical practices developed during the COVID-19 era.

The **first year was dedicated to the survey** by disseminating questionnaires and organizing focus groups and interviews with Universities' professors and students, and professionals from the food sector.

The **second year was dedicated to the testing of the pedagogical practices** identified and writing a **Whitebook** including the results of this project and the best pedagogical practices. We also developed **3 videos** to summarize the project results!

All the **reports, the Whitebook and the videos** are available on our website [HERE!](#)

## Conference: New skills: how pedagogical innovation meets the company's needs

The second and last event of our project took place at the **Paris International Agricultural Fair**, at the AgroParisTech Stand, where we were given the opportunity to **present the entire results of the project and promote our whitebook!**

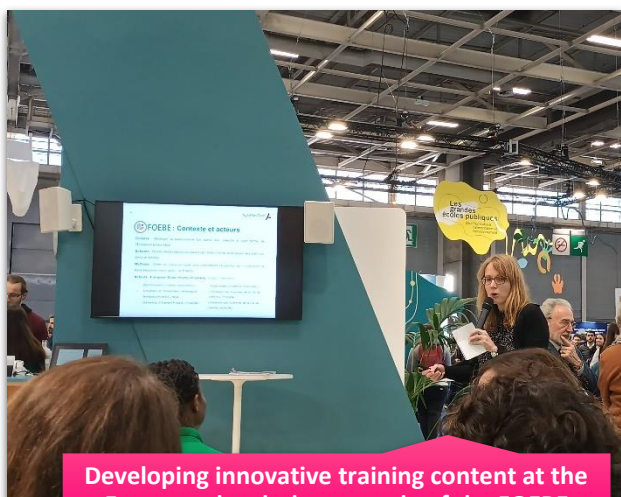

**Covid-19 crisis and acceleration of the development of digital pedagogical practices: the example of the DigiFoodEdu project**

- Marine Lonjou, project manager - EEIG ECOTROPHELIA EUROPE

**Immersive learning and higher education**

- Marie DEBACQ, head of the technology hall, AgroParisTech, and Benjamin Baatard, head of educational innovation, AgroParisTech

**Developing innovative training content at the European level: the example of the FOEBE project**

- Marine GODAUX, International and European Relations Director - AgroParisTech

**The evolution of skill needs requires changing pedagogical practices in order to contribute to the attractiveness of agrifood sector**

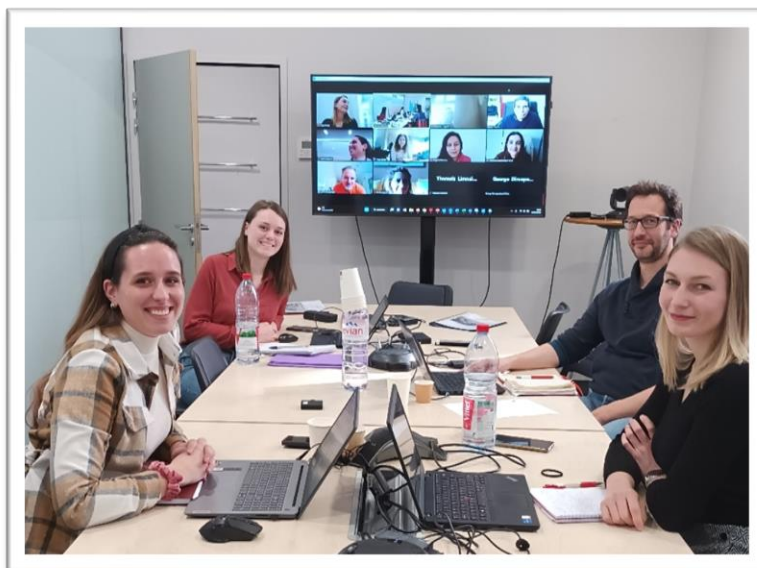

- Anastasia Boucheron, director of social affairs - ANIA

## Our last Transnational Meeting in Paris!

After 2 years of the project, we finally organised our last transnational meeting in Paris on March 1<sup>st</sup> 2023. It was an opportunity for us to meet one last time and review the project in its totality.

The overall conclusions of the project are positive. Despite some difficulties linked to the COVID-19 restrictions, we managed to successfully achieve the project.

We hope to meet and work together again in another project!
